PROFESSIONAL PROFILE

Aspiring software engineer specializing in full-stack development, currently expanding knowledge and building skills through personal projects and continuous learning. Passionate about creating web applications that address real-world problems with a particular interest in agricultural technology and community-focused solutions.

TECHNICAL SKILLS

- Frontend: React.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3
- Backend: Node.js, Express, Python, Flask
- Databases: MySQL, MongoDB, Firebase
- Mobile: React Native, Flutter
- Tools: Git, GitHub, Docker, Agile Methodologies, Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer | Freelance | 2024 - Present

- Currently working on various personal and freelance web development projects to enhance technical skills
- Experimenting with secure authentication, payment gateways, and performance optimization
- Practicing full-stack development using the MERN stack and other technologies

Software Engineering Trainee | Intensive Bootcamp | 2023 - 2024

- Completed 1000+ hours of hands-on training in full-stack development
- Built multiple web applications as part of coursework and skill development
- Gained experience in database management and responsive design

Technical Team Lead | Community Organization | 2023 - 2024

- Led a small team in developing community-focused tech solutions
- Introduced Agile workflows to improve collaboration
- Provided guidance to junior developers on modern web technologies

KEY PROJECTS

Below are some ongoing or prototype projects I am working on to expand my skills in web development:

HerderHub (React, Node.js, MySQL)

- A prototype livestock marketplace aimed at reducing transaction barriers
- Currently includes geolocation and payment integration features in development

KenyaLivestockConnect (React, Flask, MongoDB)

- Prototype B2B platform for connecting farmers and buyers
- Working on implementing search and recommendation features

Rollcall Digital (JavaScript, Python, MySQL)

- Prototype school management system with biometric attendance tracking
- Still under development with plans for more automation features

EDUCATION

Bachelor of Education (Science) - Garissa University | 2023-2027

Certificate in Software Engineering - Intensive Bootcamp Program | 2023-2024

Full-Stack Development Certification - 2024

ADDITIONAL SKILLS

- Technical Documentation
- Project Management
- Fluent in English & Swahili
